

GUIDE POST TYPES

Type Reflective Sheeting

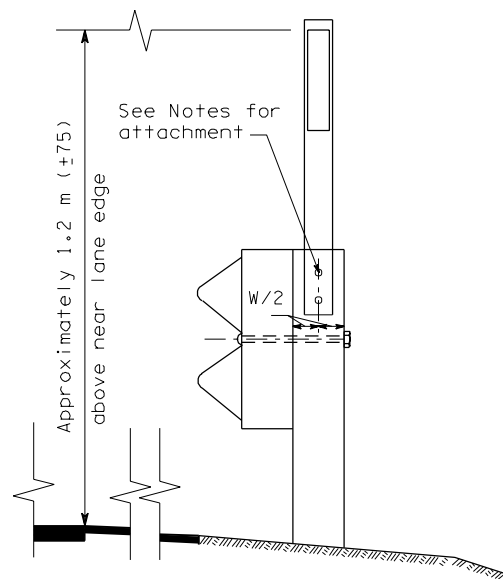

W	White sheeting facing traffic
Y	Yellow sheeting facing traffic
WW	White sheeting both sides
YY	Yellow sheeting both sides
WR	White facing traffic, red on opposite side
YR	Yellow facing traffic, red on opposite side
G	Type WW with 75 x 200 green sheeting below each white sheet

FLEXIBLE GUIDE POST

NOTES:

- The contractor shall either:
 - drive the flexible guide post in line with the guardrail posts, or
 - install the shorter flexible guide post on the guardrail post.
- Guardrail-mounted guide posts shall be fastened to the guardrail post with two 20d galvanized nails, or two 50 x 10 lag screws with washers, as near to the centerline of the post as possible. Also acceptable is any approved method submitted by the guide post manufacturer.
- Guide posts shall be 0.6 m from the edge of shoulder unless otherwise specified.
- Flexible tubular posts shall have a band of reflective sheeting near the tops of the post, at least 200 wide, around the entire post.

FLEXIBLE GUIDE POST
(GUARDRAIL)

(Use only with wood guardrail posts)

ALL DIMENSIONS ARE IN MILLIMETERS
UNLESS OTHERWISE NOTED.
